Certified
Microsoft Services
Provider

Extend your analytical reach to include internal and external data sources

As the perfect complement to Data Warehouse, Data Lake enables your credit union to consolidate all of its datasets, unlocking a wealth of insights hidden within the data.

Benefits of **Data Lake**

Consolidate primary and 3rd party data easily

- Seamlessly integrate external data sources with your Trellance Data Warehouse
- Break down the walls between first- and third-party data to expand insights

Access Data from Anywhere

- Add external data sources, enriching your analytics capabilities
- Achieve a holistic view by accessing data residing outside internal source systems

Unlock Unstructured Data

- Extract insights from unstructured data formats such as banking core system reports, card processor reports or other reports
- Transform unorganized data into actionable insights

Tap into 3rd Party Datasets

- Leverage external datasets to gain valuable insights into your credit union and its members
- Enhance decision-making with a broader perspective
